100 2011 PRODUCTS

Welcome to the *Residential Design + Build*

2011 Top 100 Products section. Throughout the past 12 months, readers have requested information about the products we publish. In the following pages, we rank the products that generated the most interest. To learn more about any of these products, use the Reader Service Card inside this issue and circle the number you see below each product description.

1 **Kichler's** Design Pro LED Linear system features a string of ¼-in. LED light pods that hide within any application and easily bend around corners and tight spaces. Each string can be cut or extended to illuminate in and around cabinets,

china closets, toe kicks, tray ceilings and other areas.
